Each day, the stat page is refreshed with more stats. And each day, the page is broken down for further information. In an area such as Leicester City, with 12 new players joining the squad, you can see in a glance how they will fit into your team, and I have also seen this with the addition of my new players in previous seasons.

When it comes to the stats, you can see an overview of each players overall performance. The most valuable player for each position and how the other players perform compared to them in comparison. This is great for managers looking to pick the best players. However, its not quite perfect. The fact that only a handful of players have not been issued with two year bans yet is not hard to understand.

However, the game is hard to do anything with. As far as improvements go, apart from the models of the players, a few tweaks have been made to the game, such as the selection and usage of players. For example, instead of using two defenders that are not in form, switching them out for one in form. If you take a look at the detail, you will find all the juicy information on each player. An increase in our visibility has meant that the business side of the game is coming into the mix. The camera in current versions of FIFA Mobile is once of the worlds best, but we can now use cameras to show certain stats during certain events. Speaking of events, now you have to perform in the appropriate day and at the right time. For this reason, the login feature has been improved. The issue has been resolved that the browser would not load at all. The game starts you off with starting kits and coins. Also, you cant install the game on two devices at the same time. 5ec8ef588b
